

Dear Customer,

As part of our continuing infrastructure improvement program, Aqua Pennsylvania (Aqua) will replace the existing 8-inch and 6-inch cast iron water main on the following streets in Easttown Township, Chester County:

- **Newtown Road between a point 300 feet north of Millbrook Road and a point 350 feet south of Millbrook Road**
- **Millbrook Road between Newtown and Saratoga roads**
- **Millbrook Road between Newtown Road and end of cul-de-sac**
- **Spring Lane between Millbrook Road and end of cul-de-sac**

The new 8-inch and 6-inch ductile iron main will increase service reliability, reduce the potential for discolored water and improve firefighting capabilities in the area. The \$586,000 project is scheduled to begin Wednesday, March 1, 2017 with the installation of 2,500 feet of 8-inch and 460 feet of 6-inch ductile iron pipe, with completion expected in May. Aqua will have an inspector on the job each day to answer your questions.

Following the installation of the new water main, there will be a period of time during which the main will be chlorinated and tested before being put into service. Activity on the job site will be limited during this phase. Once testing has been completed, we will transfer each water service and any fire hydrants onto the new main, then make the final connections on the side streets and abandon the old main. It is important to note that the trench will be covered with temporary black top at the end of each work day. Permanent restoration will be complete in the spring of 2017.

- **A detour will be in place for all work on Newtown Road**
- **Work hours for all work on Newtown Road will be 9 a.m. to 3 p.m.**
- **Work hours for all work on Millbrook Road and Spring Lane will be 7:00 a.m. to 4 p.m.**

Access will be provided for emergency, mail and trash services. Residents will have access to their properties, but at times will need to enter from different directions due to changing work zones. We will notify customers 24 hours in advance of any scheduled shutdown. However, as with any construction project, an emergency shutdown might be necessary. If so, we will restore service as soon as possible.

If you have any questions regarding the project, please contact me at 610.430.0747. Should you have an emergency, including a water quality issue, please call our Customer Service Department or emergency dispatcher at 877.987.2782.

We appreciate your patience and cooperation during this construction while we make important improvements to the water distribution system.

Sincerely,

Jim Rosser  
Construction Superintendent – Great Valley Division
